UM Wireless Manual Configuration For Windows XP

Step 1: Go to Control Panel and double click network connection icon. Right click wireless connection and select “View Available Wireless Networks”

Step 2: Choose wireless network for example “WIFI_08_STUD” or “UM_wifi_roam” and click connect.
Step 3: Open your internet browser to view the network login web page. Type in your Username and password (for student, use your Perdanamail username & password for login. As for staff the UMmail username & password can be used) and click “Login”. You should now have a working network connection.
