

RideClicked Intra-varsity

RideClicked Intra-varsity is a ridesharing concept that aims at making commuting within the campus a pleasant one. It leverages on the cars available in the campus and complements the campus shuttle bus services. Hence, it reduces the waiting time and increases productivity. This concept is first of its kind in Malaysia, and was founded by two UM students – Foong & Tham.

Apart from intra-varsity commuting, RideClicked also offers a platform for long-distance ridesharing via a website platform. It aims to be the people-powered transportation network.
